

Risk / return ratio

Investment objective and policy

The objective of this dynamic mixed fund is to generate capital appreciation with lower volatility than the equity markets. The fund has a global investment universe of equities, bonds and money market instruments; exposure to precious metals is also possible through ETCs (Exchange Traded Commodities). The allocation to equities varies between 50% and 100% with a neutral allocation set at 75%. A minimum of 20% of the fund's assets will be invested in sustainable assets. The fund aims to preserve capital over the long term and to reduce the downside probability during equity market corrections.

Key Features

A dynamic profile within BLI's family of wealth management funds;
 An active, conviction-based approach oriented towards generating an attractive risk-adjusted return over the long term;
 Allocation to different asset classes, according to their risk-return characteristics:
 Equities as the main performance driver;
 Sovereign bonds as protection for the portfolio;
 Precious metals (via ETCs) to protect against systemic risk.
 Equity allocation between 50% and 100%;
 Investments in equities according to strict quality and valuation criteria;
 Integration of ESG factors at different stages of the investment process (exclusions, analysis, valuation, monitoring of controversies, voting policy and engagement);
 Non-benchmarked management resulting in significant deviations from the initial investment universe;
 Particular attention paid to reducing downside risk;
 Low turnover.
