

Risk / return ratio

Investment objective and policy

The fund aims to protect capital by investing in bonds and offering a higher return than a euro money market investment. The recommended investment horizon is medium term. The portfolio benefits from a very broad investment universe including sovereign, quasi-sovereign and corporate issuers from developed and emerging market countries, without geographical, sector, maturity or currency restrictions. A minimum of 25% of the assets will be invested in Investment Grade bonds. Through an active approach, the fund manager seeks to take advantage of the disparate nature of global bond markets to build a portfolio with an attractive risk-return profile. The fund pursues a sustainable and responsible investment strategy through three main avenues: a minimum of 10% of the portfolio's net assets invested in impact bonds, an ESG optimisation strategy based on a proprietary rating for traditional sovereign issues, and close monitoring of environmental and social indicators for traditional corporate bonds with the objective of these improving over time. A minimum of 30% of the fund's assets will be invested in sustainable assets. Through an active strategy, the fund manager aims to outperform the fund's investment universe over a medium to long-term horizon while protecting capital during market downturns.

Key Features

A very broad investment universe allowing for optimal diversification within the different bond sub-asset classes;
 Particular attention paid to reducing downside risk;
 Non-benchmarked management resulting in significant deviations from the initial investment universe;
 Portfolio managed from the perspective of a euro investor.
