

Risk / return ratio

Investment objective and policy

The fund's objective is to generate long-term capital gains by investing in high-quality companies listed on equity markets anywhere in the world that have a solid sustainable competitive advantage. In addition to financial criteria, the selection process integrates environmental (E), social (S) and governance (G) factors. The investment strategy combines several sustainable dimensions (exclusion of controversial activities, quantitative screening and a thematic segment geared to the Sustainable Development Goals (SDGs)). The fund aims to generate higher risk-adjusted returns than its benchmark universe over a full market cycle. A minimum of 75% of the fund's assets will be invested in sustainable assets. Targets have been set in terms of the portfolio's environmental, social and governance performance and are regularly monitored. The fund manager implements an active, long-term strategy based on solid convictions.

Key Features

- An active, conviction-based and purely bottom-up approach, oriented towards the long term;
- A selection of quality companies that have a sustainable competitive advantage and a solid ESG profile;
- A multi-faceted ESG approach: exclusion criteria, quantitative ESG screening and a thematic pocket based on the SDGs;
- Defined and quantifiable impact indicators on environmental, social, governance and human rights aspects;
- Non-benchmarked management resulting in significant deviations from the initial investment universe;
- Low turnover.
